Granite Construction Company

Company:	Granite Construction Company
Location:	UAE
Industry:	EPC Contracts for infrastructure, energy, engineering, water/sewer/civil, and government
Granite Construction Company Profile:	
ERP Software:	Microsoft Dynamics ERP

Established in 1971, Granite Construction Company, UAE, is a well-known EPC contracting organization, delivering projects in infrastructure, energy, engineering, water/sewer/civil, and government services.

Since inception, the company's expertise in the application of technology has earned steep respect and trust among its clients. Granite Construction Company WLL is well known for its strategic planning, technical expertise, stringent quality, and Health, Safety and Environment (HSE) policies. The team ensures high-quality delivery with stringent adherence to HSE standards. This has translated to an excellent project delivery track record and several awards won over the years.

Granite Construction Company services large projects that constantly needs high quality work delivered within strict deadlines. The company's customers use Enterprise IT solutions and expect their suppliers to be compatible with their systems for ease of transition.

Initially, Granite Construction Company used varied specially applications to handle its multiple project operations. The lack of a seamless integrated digital system meant:

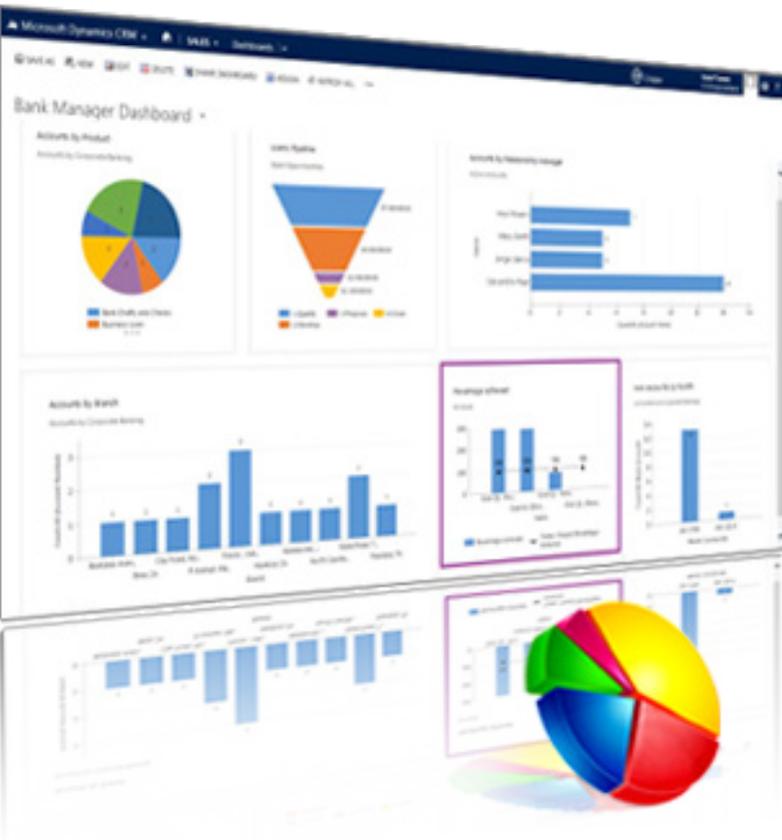

- Wasted time transporting data between systems
- Delays
- Data loss
- Data duplications
- Added costs

SOLUTION:

Granite Construction Company reviewed numerous Tier-1 ERP solutions. After a thorough process study, it asked CEM Business Solutions to implement Microsoft Dynamics ERP. The initial rollout of Microsoft Dynamics AX2012 happened in 2015. Granite Construction also selected the following add-on modules from CEM Business Solutions for additional support: PMV (Plant, Machinery, Vehicle), Scaffolding, Tools Management, Temporary Worker

Housing, Manpower Hire and Concrete, and Rate Contract Solutions.

S. Duraivel, Director – Projects Controls, Granite Construction Company, said, “When Microsoft introduced its Cloud-based ERP – Microsoft Dynamics 365, we were immediately attracted to its features like Platform-independence, Multi-form factor solution, Browser-based ERP, Intuitive workflow, Power BI, AI and Azure. We have derived substantial benefits from Microsoft Dynamics 365’s competitive advantage. We have seamlessly migrated our many projects from one system to another. Migration from the on-premise system to a Cloud-ERP is a tricky and risky job, but CEM Business Solutions was able to provide a solution that worked to our advantage. In the digital era, keeping up with technological advancements is vital for a company’s growth. Technology makes our business competitive and gives us the edge. In our journey, we trust Microsoft and CEM Business Solutions for have enabled both.”
